For Immediate Release-Grant County Health Department Seasonal Flu Shot Clinics Announced

The Grant County Health Department has scheduled its public seasonal flu shot clinics for the 2014-15 season. This year the vaccine includes both an H1N1 and H3N2 strain as well as a B/Massachusetts strain. The quadrivalent vaccine has an additional B/Brisbane strain as well. A supply of high dose flu vaccine is available for those 65 years of age and older. Vaccination is recommended for all persons aged ≥ 6 months unless there is a medical reason why vaccination is not recommended such as an allergy to one of the vaccine components.

Children under 9 years old receiving seasonal flu vaccine for the first time and those not completing a series in previous years may need a booster shot one month or more after the first shot to gain the highest level of protection. Grant County Health Department has free flu vaccine available at these clinics for children on Medical Assistance/Badger Care or for children with no insurance coverage for influenza immunizations.

In addition to the posted schedule, seasonal flu vaccinations are now available at the Grant County Health Department located at 111 South Jefferson Street in Lancaster from 8:30 a.m. -12:00 p.m. and from 1:00 p.m. - 4:00 p.m. Monday-Friday. Additional clinics will be announced later in the season including possible school based clinics.
